ATLANTA
AUDIO & AUTOMATION

About Us

Founded in 1998, Atlanta Audio & Automation strives to be the most trusted resource for residential electronic integration needs, helping clients navigate and maximize their enjoyment of innovative technologies today and into the future.

As a full-service technology provider, we encompass all aspects of your home technology project, starting with the initial design, project management, installation, and finally any service and support that your system may need. Our certified and highly trained professionals create home entertainment and home automation systems that are intuitive, simple, and reliable. We make it our mission to provide you with a system and experience that is compelling and designed specifically with you and your family's lifestyle in mind.

AA&A is active in the community and provides industry training to various organizations such as the American Institute of Architects, American Society of Interior Designers, and the Greater Atlanta Home Builders Association through our Registered Outreach Instructor program. We are committed to the growth and knowledge of our profession and have active memberships with the Custom Electronics Design & Installation Association (CEDIA) and the Consumer Technology Association. AA&A is also recognized as a Certified HTA company. The Home Technology Association recognizes firms that undergo a rigorous

background check to ensure that we are technically competent, demonstrate solid customer service, and have a positive reputation.

Sharing knowledge about technology in the community is also very important to us. We are proud to work with the Gary Sinise Foundation Restoring Independence Supporting Empowerment (R.I.S.E) initiative to provide specially adapted "smart homes" to wounded veterans. We provide automated homes to wounded veterans so they can control everything in their homes from lighting to security giving them the helping hand they need to complete everyday tasks.

Our work and craftsmanship along with our customer service and dedication to our customers has been honored with many awards including the 2017 Bronze "Best Smart Home" from Electronic House, and 2016 -2018 Best Home Integration Company by Atlanta Home Improvement Magazine. Additional awards include: 2015-2021 Diamond Dealer from Sony Electronics, Control4 Platinum Dealer, 2017-2021 Control4 Certified Showroom Dealer, and Crestron Home Certified Dealer.

With decades of home electronics experience and a dedication to excellence that is second to none, we are confident you will find working with AA&A to be an enjoyable and rewarding experience.

“ Our Mission, is to make your home safe, reliable, elegant, fun, and easy to use. We are focused on providing our clients with expertly trained professionals whose #1 priority is to design and deliver state-of-the-art products and systems along with consistent 24/7 outstanding customer service and support. ”

*-Phillip Ampel
President & Owner, Atlanta Audio & Automation*

“The team at Atlanta Audio & Automation did a great job designing and installing a broad smart home solution in our new home. Excellent service.”

- John Adamson

“Working with the Atlanta Audio & Automation team has been a great experience. We've now executed several projects with them and they've done an outstanding job from project design through execution of each project. We will continue to engage them moving forward as we have additional needs..”

- Tom Galica

“I am happy to recommend this outstanding company to anyone interested in any aspect of home automation. The options are multiple and often confusing, but Philip and his team make the experience fun and exciting. Most importantly, the equipment works and they are always there to keep it that way. It is a pleasure to give them my highest rating.”

- Alan Sunshine

“Philip, I am just astounded by the sheer dedication and determination you and your team showed to get our total home installation completed perfectly. It was an amazing display of professionalism. Wow! I always believe it pays to work with the best in the business, and you demonstrated that clearly this week. You are the best, and it is a pleasure working with you.”

- Bill Krochalis

“Phillip, your team is wrapping up a AAA project in our home during the next day or so and I wanted to write you this note to express our appreciation for the outstanding work provided by your team.

We met Rod back in the winter as we were deciding on which company we wanted to partner with for Security, Automation, Audio, and Control in our new home that was under construction. Rod was a pleasure to work with and very attentive. We met with Rod several times and each time he was well prepared and passionate about AAA's ability to provide us everything we were looking to accomplish, and more. He had expert command of all the technology that he was explaining to us, down to the last detail. We were impressed with your Alpharetta showroom and the demonstrations of what was possible. Rod painted a great vision. We were excited about our purchase and the technology that was going to be installed in our home.

This week Steven's team came out, they were always on time and well prepared. We were so impressed with the attitude, skill and organization that Steven and his team demonstrated to us. Everyone (Steve, Jason, Jonathan, Josh, and Josh) that we interacted with were very professional, very courteous, very experienced and a pleasure to work with. They represented AAA very well! We were twice as excited to know that the vision that Rod laid out for us was being realized by the technology delivered and the skill of the technical team.

Thank you so much for a great project. Thank you Rod and Steven for the great work you provided in making it happen!

We look forward to enjoying and using the technology and we are not done yet. The next step is getting the basement finished and then calling Rod for more AAA technology and services!”

-Ben Victoria

Hear What Our Clients Are Saying

“ Atlanta Audio and Automation is the best audio, video, and security company in Atlanta, period. Phillip and Jon pleasantly exceeded my expectations in every competency that I evaluate service providers in related to the Audio, Security, and Video work they did at my house. They are truly a dynamic duo akin to Batman and Robin or perhaps more appropriately Jordan and Pippen.

Before selecting Atlanta Audio and Automation I did extensive research on the top AV companies in the Atlanta market. The things that made AA&A distinct versus the competition were as follows:

1) Expertise in the field - Phillip and Jon are extremely seasoned professionals with extensive industry knowledge, 2) Industry reputation - everyone I talked to was very complementary of their customer service, 3) Cutting edge technology and workmanship - no one else I talked to offered such a stellar

combination of equipment, automation/integrations, and know-how, 4) Customer service - Phillip is customer focused and wants to make sure you are happy, and 5) Propensity to deliver value.

My project scope was very complex with four separate and distinct sub-projects included in the overall project scope. This included work inside the home, outside the home and in the attic space. During the proposal process Phillip responded promptly to my inquiries and took the time to explain certain aspects of my project. The thing that has impressed me most with Phillip is that he has never tried to sell me more than I needed or sell me something I did not need. He had to refocus me on what was important a couple times while we were making equipment selections and that focus helped me get great value out of the project. Phillip has an uncanny ability to understand the project scope, recommend top-notch equipment and components and hand off the execution

to Jon and his team. Jon and his crew continue the high-level of discipline and workmanship during the execution phase including ensuring a clean, and professional installation in each sub-project. Jon also made sure that my family was well educated how to use all the system components. Perhaps equally as important is the ongoing service and support AA&A provides if you have any system issues, as Phillip and Jon are just a phone call away. My family is thrilled with the finished work. Each AA&A team member was incredible to work with.

AA&A is simply a pleasure to work with and are why I will remain a loyal customer for years to come. For anyone thinking about having any audio, video, security, or automation work being done from the simplest to the most complicated, I give AA&A my highest recommendation. If you want the best, use the best — and that would be AA&A!

- Eric Benson

Integrated home technology enables all technology in your home to seamlessly communicate together in an intelligent way to simplify your life. It encompasses much more than just lighting and shade control. Today's modern home must combine lighting, climate, shades, home entertainment, security, surveillance, door locks, hot tubs, pool, irrigation, water and air quality sensors, and much more on a single platform that is accessible from any mobile device or tablet... anywhere in the world.

Atlanta Audio & Automation's expertise in designing and programming simple, intuitive systems, integrating climate, lighting, sound, video and security allows you total and

reliable control of your home from a single wireless or in-wall touch panel. This inspired, integrated approach eliminates clutter, mismatched wall switches, and multiple remotes. Atlanta Audio & Automation unites all these functions in a personalized, simple touch-pad that even your guests will be able to operate with ease.

Smart home systems coordinate the technology in your life into complete, brilliant experiences - interactions that fit your lifestyle and are easy for your family to enjoy. With one touch, dim the lights, play music, turn up the heat, lock the doors and arm the security system. Or, have your house respond to your schedule and needs without touching anything at all.

There are many smart devices available today - TVs, thermostats, door locks, even light bulbs that you can control with your smart phone or even with voice recognition technology. These devices operate just fine on their own, but when they are joined together and played in orchestration - well, that's a symphony of technology working in true harmony.

A smart home will maximize your comfort, convenience, entertainment and peace of mind. And with the help of an Independent certified Control 4, Crestron, and Lutron Dealer like Atlanta Audio & Automation, it's easy to update and adapt your home to your changing needs today and in the future.

Home Automation

Make your home the smartest on the block.

Personalize your home to be more comfortable, convenient, and secure.

You come home at night, press a button on the wall next to the front door, and lights come on in the hall, kitchen, and den. Or even better, you turn on the lights and unlock the door with your smart phone while in sitting in your driveway before you come into the house. While relaxing in the living room you notice it's too bright, so you adjust the lights using your tablet. If there's nothing interesting on TV, with one tap on your smartphone, the home theater system turns on, and in moments you're streaming your favorite movie. Simplify your life with home automation.

Simplicity, Safety & **Convenience**

The purpose of home automation is to give you the ability to control every aspect of your home from almost anywhere. From touchscreen interfaces to smartphone and tablet apps with remote capability to voice recognition technology, it's easy to interact with lighting, climate, security, multi-room audio and video, and more. A Smart Home can be as simple or as extensive as you want and can expand easily to meet your changing needs in the future.

Take your Smart Home
anywhere

Whole Home Audio & Video

Whole home audio and video systems more than just entertain you, today's high-end audio video technology should immerse you... in vivid sights and rich sounds, becoming a uniquely enriching experience that you see, hear, and feel. With Atlanta Audio & Automation, it will. We offer awarding winning solutions such as Control4 Entertainment and Crestron Home systems with a variety of top notch audio and

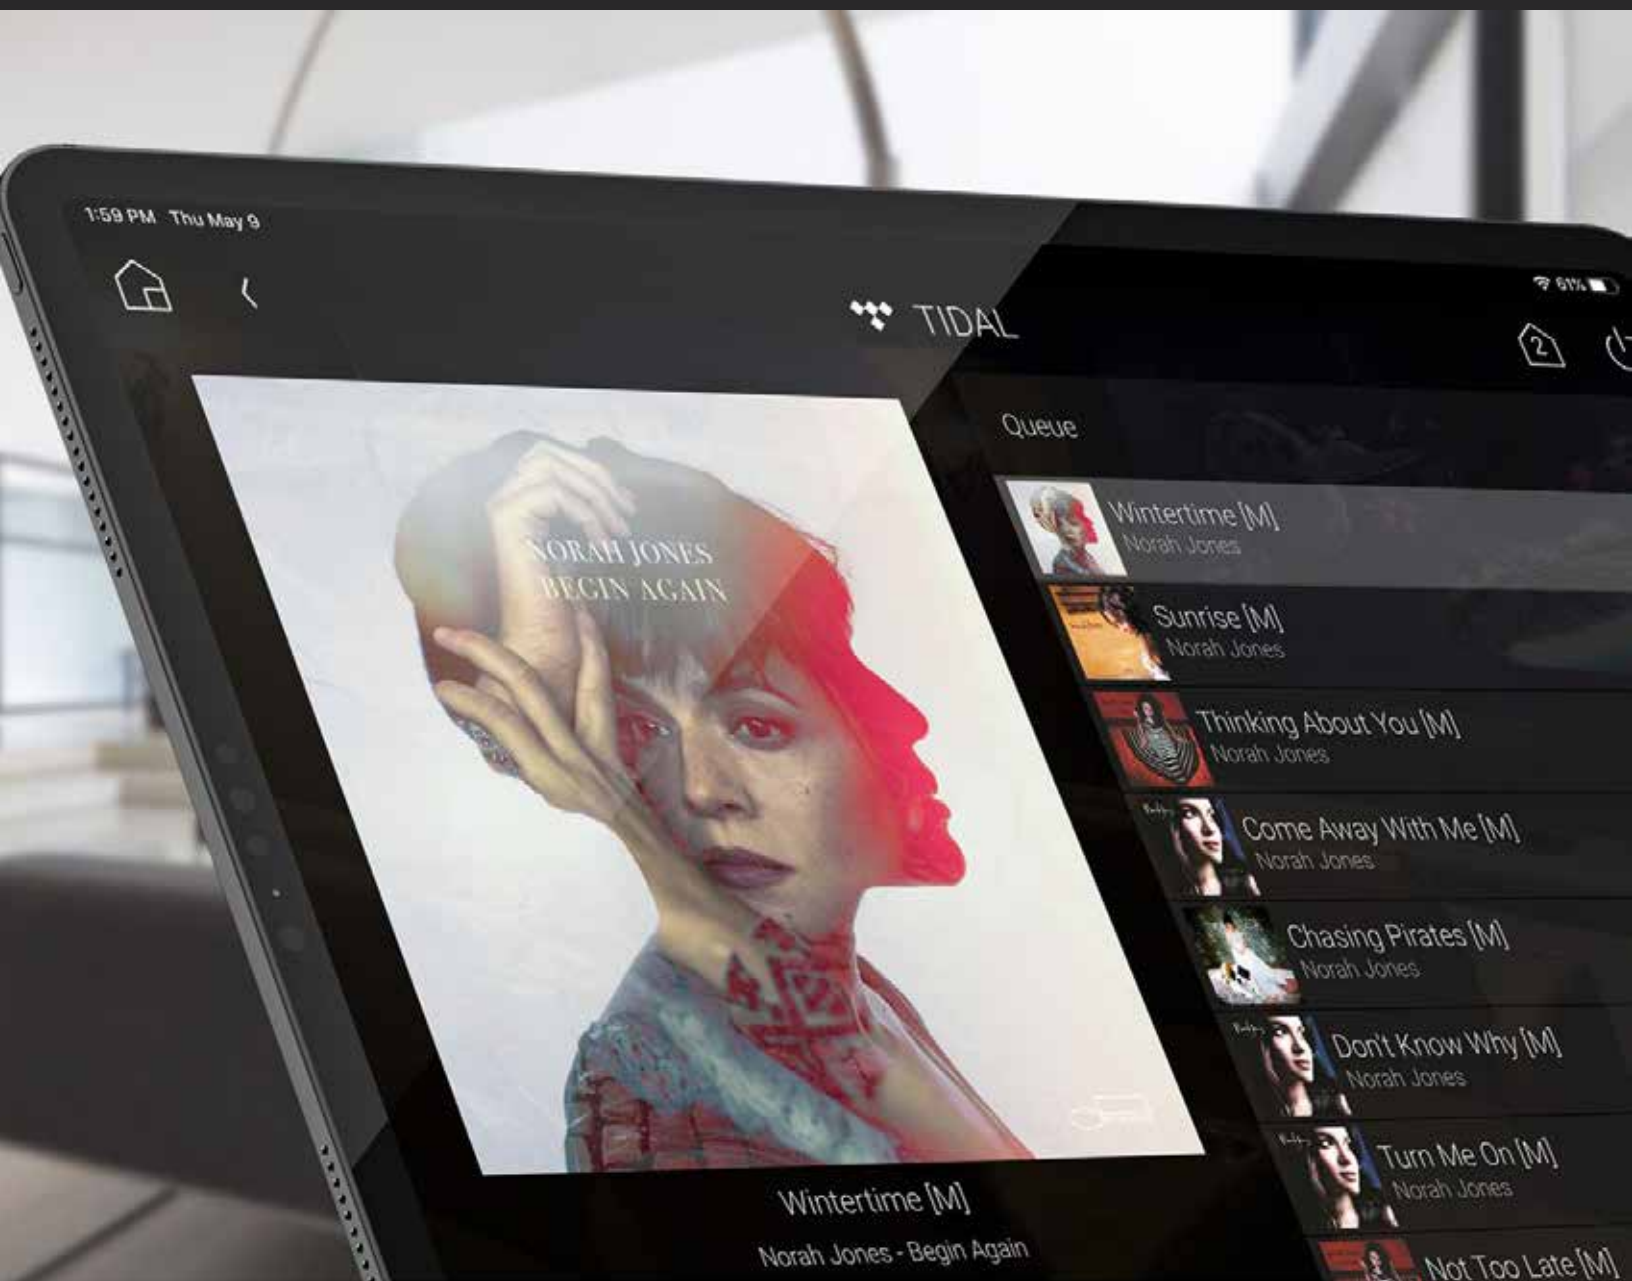

video technologies together with custom design, installation, and service.

Whole home audio and video is one of the hottest and most enjoyable trends in home technology today. Jazz in the kitchen, pop in the kids' room, and rock outside on the deck during a BBQ while a movie is playing in your family room will add hours of enjoyment to your home. Accessing your music through Spotify, Amazon Music, Deezer, iHeartRadio,

SiriusXM, Pandora TIDAL, and Airplay - with the touch of a button on your phone or tablet is something that just can't be beat!

Imagine having music in every room of your home with nothing more than the phone in your pocket to control it and virtually invisible in-wall or in-ceiling speakers in each room. This is the dream system of interior decorators and is typically only found in higher-end homes. Or even one better, how about

a wireless system that lets you add wireless speakers to as many rooms as you please all controlled from your smartphone or tablet. Already have a stereo or home theater that you love? We have wireless audio solutions for that too. There are so many options and systems configurations available, we are sure to find one that will fit your lifestyle and needs.

Whole home audio and video is more than just speakers and TVs throughout the house; it's about seamless and simple access to your entire digital library. It's about listening or watching what you want, when you want, where you want, with ease.

Sound that brings your **home to life**

With many shapes, sizes, and installation options, in-wall and in-ceiling speakers provide beautiful sound without intruding on your home's interior design. Paintable in-wall models completely disappear so your décor is all that's seen. There are even invisible speakers that are installed behind the sheet rock, so you only hear the sound and not see the speakers.

Change the way you listen to music — **forever.**

Enjoy access to millions of songs and thousands of artists through popular streaming services — such as Spotify, Amazon Music, Deezer, iHeartRadio, SiriusXM, Pandora, TIDAL, and Airplay — without the need for extra gear.

- Send music from virtually any source, including your smartphone or tablet, to any room in your house. You can even allow your guests to stream their music collection from their portable devices.
- Manage the volume, start or stop music and even control your lights, thermostats, or door locks with a single tap, or integrated voice control.

Fill your entire home with music or listen to a specific playlist in just one room. You'll appreciate the flexibility to enjoy high resolution music, your way. With wired or wireless solutions, your interaction with music is visually stunning.

Simplified Multi-Room Audio & Video

Distribute video throughout the house so that you can enjoy beautiful, 4K or 8K high-definition content in every room without adding clunky gear and wiring behind each TV. With multi-room video, everyone can enjoy the same movie or watch what they want, wherever they want.

Share your entire movie library, streaming video and satellite channels throughout the home — no need for set-top boxes and multiple video sources in every room. Consolidate all of your audio and video equipment into a closet, creating a clutter-free installation, while delivering superior sound, stunning 4K or 8K high-definition video and an incredible experience in every room.

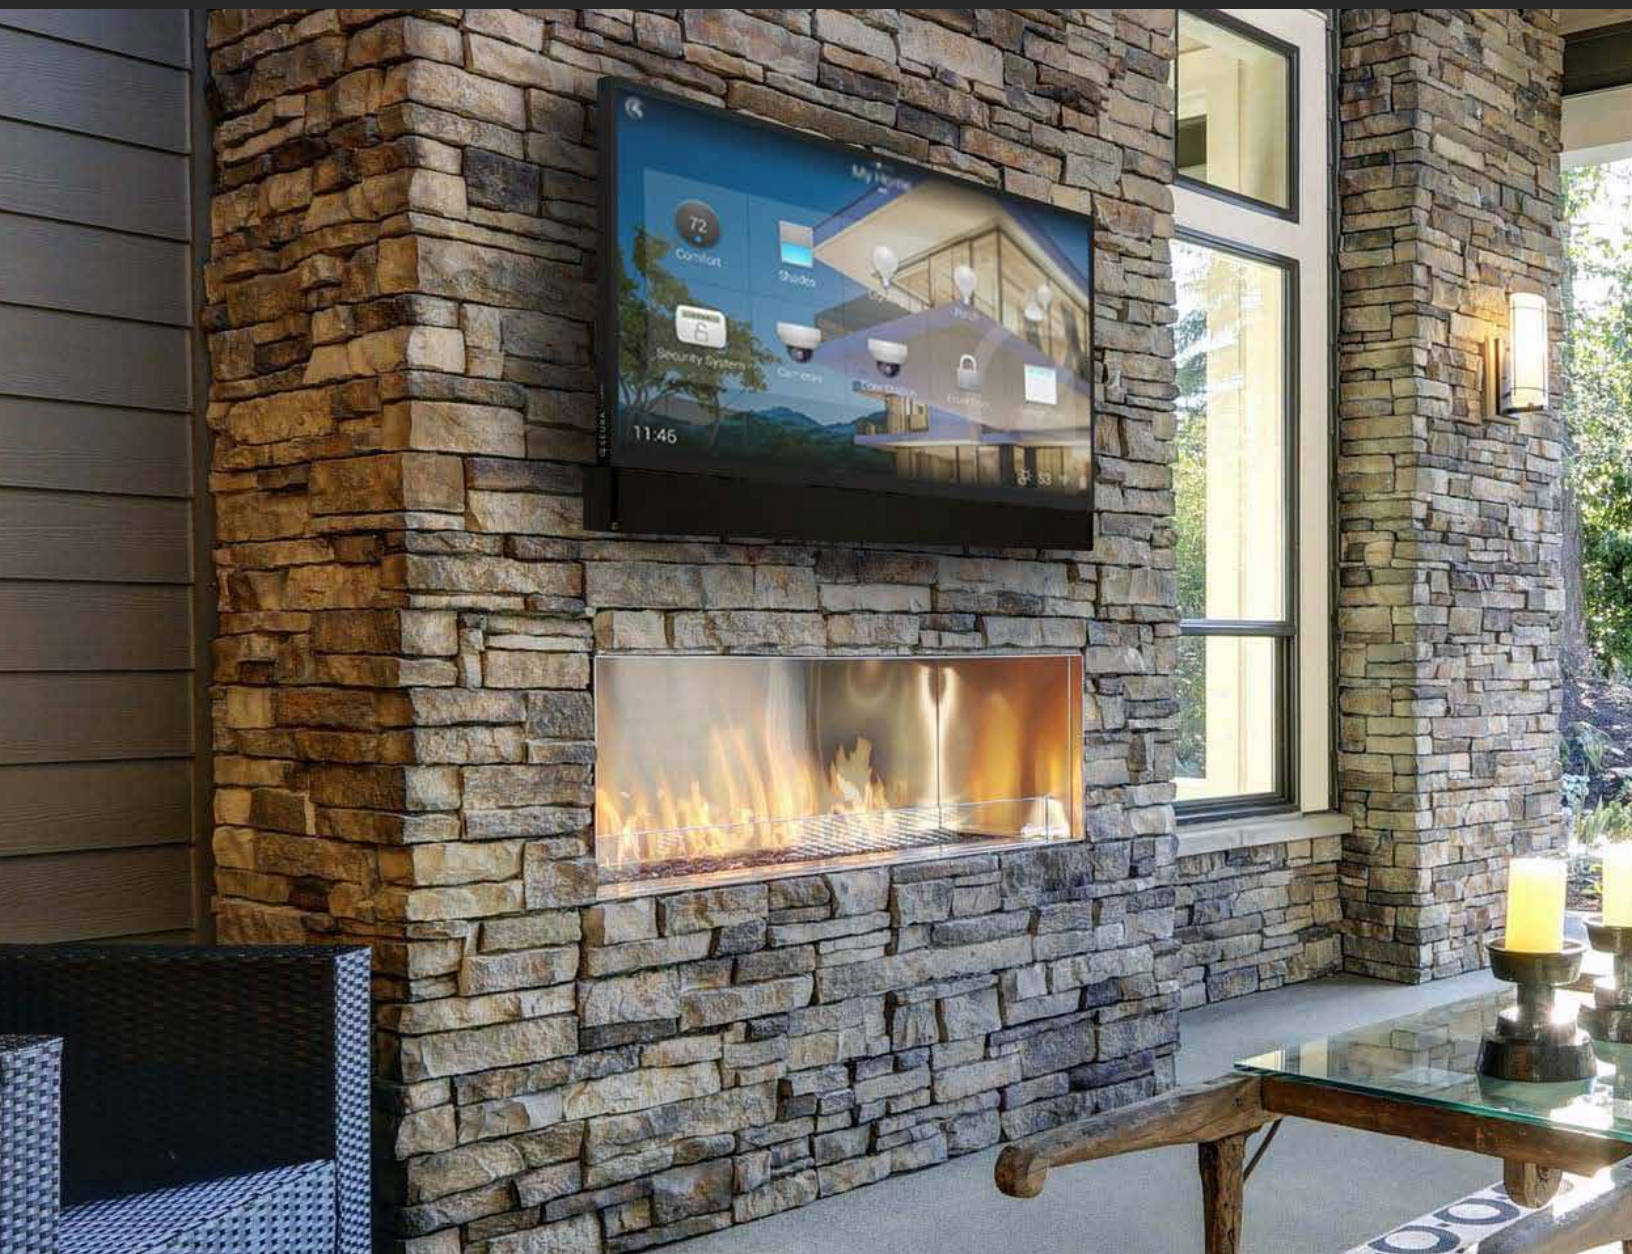

- Browse your movie library and video streaming services like Netflix, Hulu, and Amazon Prime from any TV, touch screen, or mobile device — anywhere in the house.
- Watch sports in the den, the news in the kitchen, and kids movies in the family room. Each room has access to every video source and an intuitive, on-screen interface makes it easy to select the right one.
- Instantly share new content as your library expands or you add video sources throughout the home.

Outdoor Entertainment

Whether you're enjoying the pool, hot tub, patio, or the expanse of a beautiful lawn, there is a certain peace that comes from being outside. Why give that up to listen to music, or watch TV? Robust, all-weather TVs designed for the elements can live outdoors year-round. All-weather speakers combine high fidelity with sealed enclosures to keep Mother Nature out.

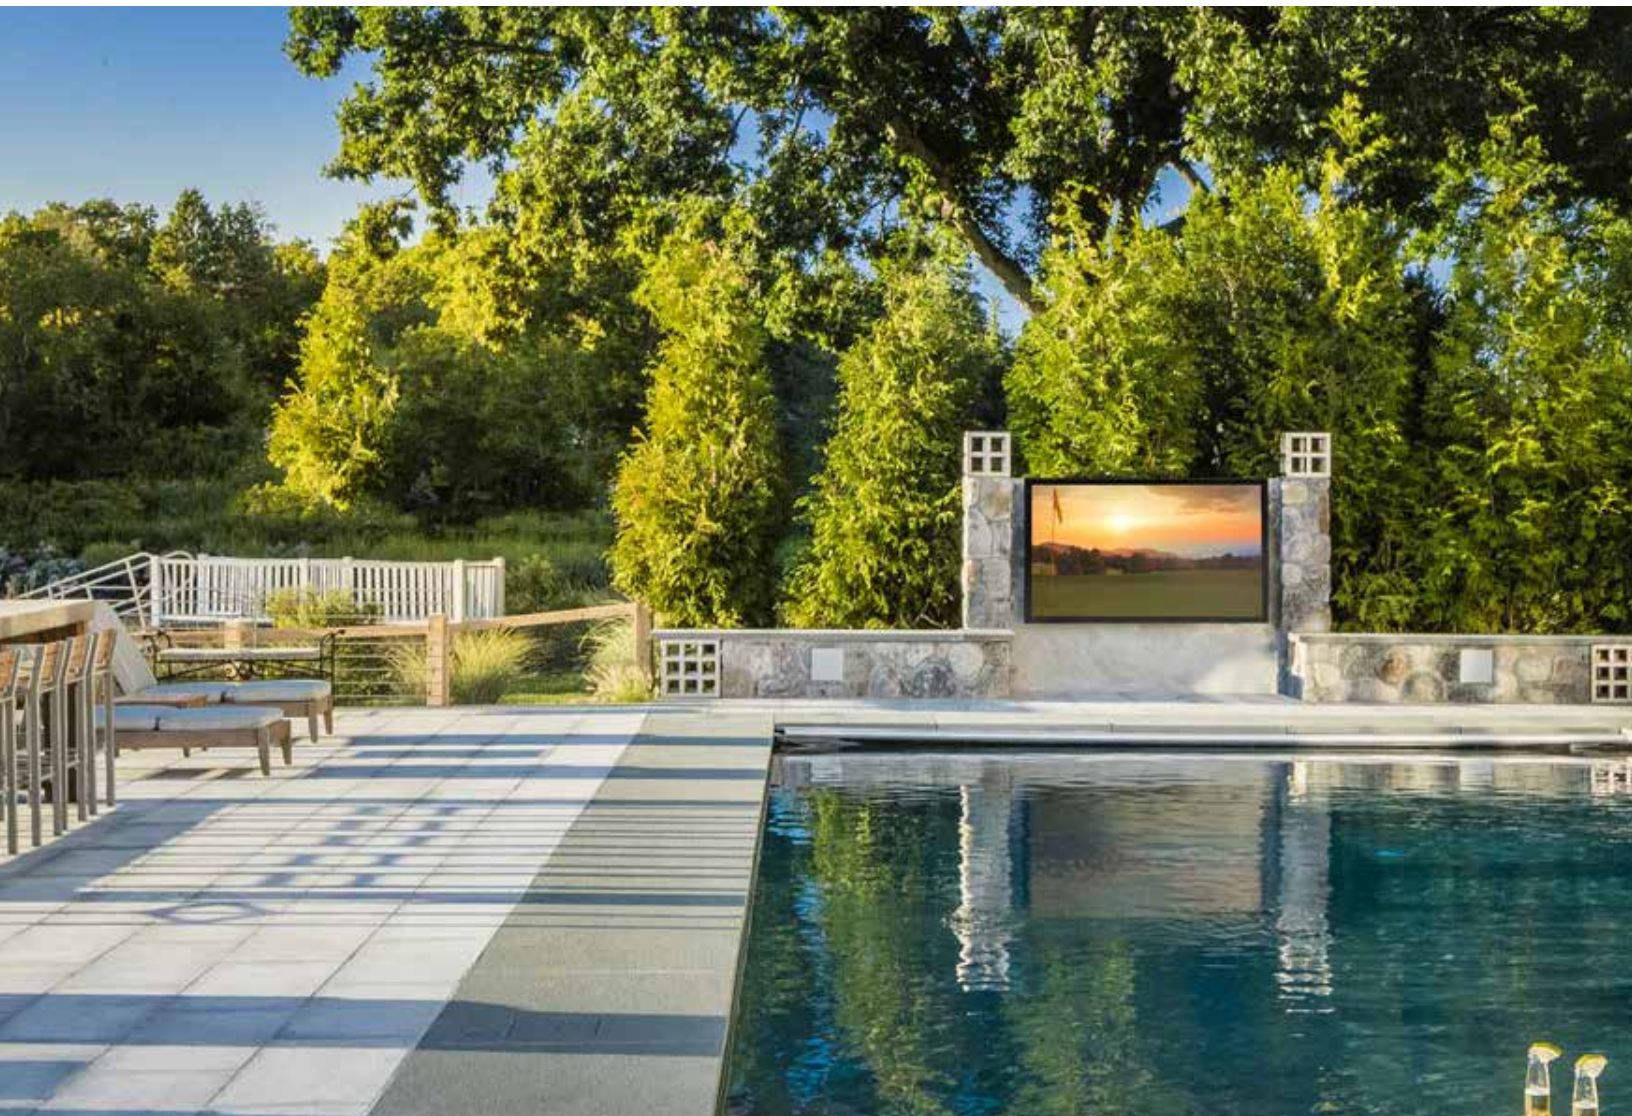

Don't want to see the speakers? No problem. With new technology, you can access your entire audio/video library from the yard with speakers that seamlessly blend into your landscape and architecture. Bring your movies and sports games along with your music out into the world, and enjoy it under the stars and sun. Atlanta Audio & Automation will bring your indoor entertainment outdoors for you to enjoy.

Speakers designed to withstand the elements and deliver great sound. Don't let ordinary speakers ruin your landscaping. From garden speakers to rock speakers in many shapes and colors, Atlanta Audio & Automation offers a wide variety of rugged outdoor speakers that blend with their surroundings. Near-invisible outdoor sub woofers provide bass that might otherwise disappear. Your outdoor sound will just amaze you.

Wouldn't it be cool if you could turn on the spa from the bedroom as you put on your swimsuit? With a Automation System you can do all of that.

- Manage pumps, heaters, covers, and water features
- Control both pool and landscaping lights
- Monitor pool "health"
- Custom scheduling to fit your lifestyle
- Conserve energy by automatically controlling solar covers
- Protect landscaping and conserve water

A/V that doesn't care about the weather

Perfect for the ultimate outdoor deck, patio, pool, or BBQ area. Atlanta Audio & Automation offers all weather outdoor TVs from a variety of award-winning companies. Styled to show your friends and family that you are serious about outdoor entertainment.

Architectural Landscape Lighting

Architectural and Landscape lighting provide high quality light with optimal energy efficiency, lifespan, and durability. LED area fixtures and accessories offer safe illumination for walkways and create ambiance to highlight landscape and hard scape features along the way. Lighting automation allows you to control the zoning, dimming, and color of the lighting to create the perfect vision of your outdoor space.

Networks & WI-FI

Why The Network Matters

Envision your home where all of your technology communicates effortlessly. Sophisticated networks streamline connections between AV, security and more. Exceptional Wi-Fi speeds and reliability throughout your home provide expanded bandwidth for high-performance AV, lighting, and security for all of your connected devices.

Without a reliable and efficient network, even the smartest devices are rendered dumb. Each connected device adds strain to a home network, impacting both the throughput and, ultimately, the availability of a wireless connection within the house. This is why the network has quickly become one of the most important systems in your home.

Your smart home needs a network that is scalable, adaptable, intuitive, and ready to perform.

A strong network foundation will ensure that all of your automated conveniences, audio and video luxuries, and security systems are reliable and functioning optimally. With a network designed for smart homes, you can alleviate strain caused by video buffering, missed beats, application freezing, and slow response times. With the right network, the comfort and performance of your modern home is optimized.

Connected Home for a **connected life**

When these sleek and powerful wireless access points are placed around your home, the connectivity is improved.

- Remote diagnostic services keep the network running smoothly at all times
- Programming designed for home automation systems
- Enterprise-quality construction with elegant aesthetic
- A network designed to handle the many types of data in your home, especially AV and automation

Reliability

From Netflix to Xbox to iPads, the network is designed especially for your connected home so everything works all of the time. Your network traffic is prioritized so your experience is seamless, reliable, and consistently dependable. Email and Internet searches won't be interrupted while concurrently streaming movies or music, cameras, intercoms, and other online devices are trusted to perform as they should.

Scalability

A network is a platform that evolves with you. As your technology demands change, some homes and solutions require more sophisticated configurations. With the simple addition of a component or two, your home network can be easily be updated to manage new devices and adapt to changing network needs.

Simplicity

The wireless controller scans your local environment to adapt and optimize your wireless performance while access points provide coverage throughout the home and enterprise level wireless communication between all devices within a network. Never worry, or think about your network again. It works like you'd expect, on every interconnected device, from anywhere in your home or yard.

Safety & Security

From maintaining a comfortable temperature to wellness enhancements such as dawn simulation, circadian rhythm lighting, and air purification monitoring to integrating your lights, locks, security systems, video cameras, digital recorders, and water leak sensors into an automation system. Atlanta Audio & Automation takes safety and security to a whole new level.

In the past, you were used to arming or disarming your house with a local keypad while you left your home. What did you do on those rare occasions when you forgot to set the alarm?

With home technology from Atlanta Audio & Automation you don't have to worry about that anymore. You can arm and disarm your house from anywhere in the world. Make your home more secure by integrating your lights, locks, security systems, video cameras, and digital recorders with your automation system. Check in on things at home from wherever you are.

Receive alerts when someone enters the house, the garage door is left open, or a leak is detected in the basement. Intelligent safety security puts peace of mind at your fingertips so you can rest assured that

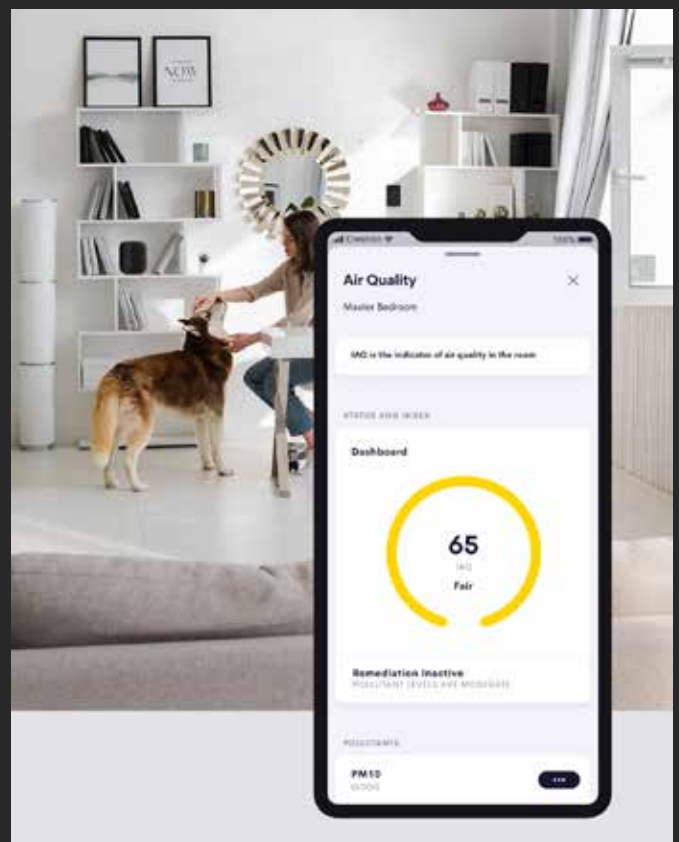

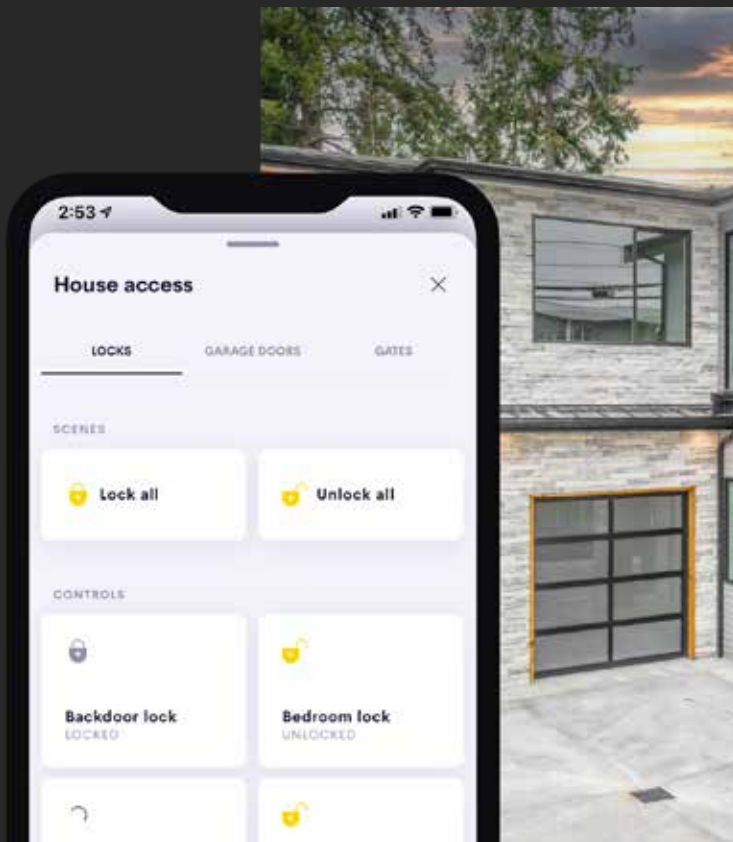

all is safe. A security system fully integrated with a home automation system means your family's safety has never been more secure. Smarter security combines perimeter security and video surveillance with fire, water, smoke detection, and even air purification monitoring. Smart alerts and smart fire alarms that turn off HVAC and turn on hallway and exterior lighting. Remote access offers additional peace of mind. Atlanta Audio & Automation offers this protection and comfort which can be configured to do as much, or as little as you want. Plus, it's easy to add control, as needed, in the future.

From door locks that email or text you when opened, to security cameras you can access from anywhere in the world, your smart home is a safe home. Check your front porch for packages, let your spouse in when keys are forgotten, see who's at the front door without getting off the couch, see your kids remotely from your iPhone, or activate your alarm system remotely. The possibilities are endless. Atlanta Audio & Automation offers you peace of mind, accessibility, and security.

Does your current security system ramp up the lights when the alarm sounds? Does it flash the exterior lights to alert the neighbors? Security integration with your home automation system adds this intelligence to better protect your investment and your family. Plus, it can send email alerts to your smart-phone and allows you to remotely arm or disarm the system.

Your smart home is a safe home

- Replaces unsightly security keypads
- Instantly see if doors or windows are open
- Lock every door and arm or disarm the system remotely
- Easy accessibility via mobile phones and tablets
- Check on the kids, whether you are downstairs or downtown
- View the video feeds from your security cameras, right from your mobile device
- Receive a text alert when the system senses trouble, including water leaks or to simply let you know the kids arrived home from school
- Assign temporary security codes for deliveries and service workers
- Randomize lights and audio/video equipment to make it look like you are home, even when you're not
- Wellness modifications such as dawn/dusk simulation for circadian rhythm lighting to improve sleep, energy, and mood to wellness air quality readings to adjust fans throughout the home to remediate any air quality issues
- 24/7 security monitoring providing state-of-art certified monitoring stations for your safety

Locks, Sensors, & Surveillance

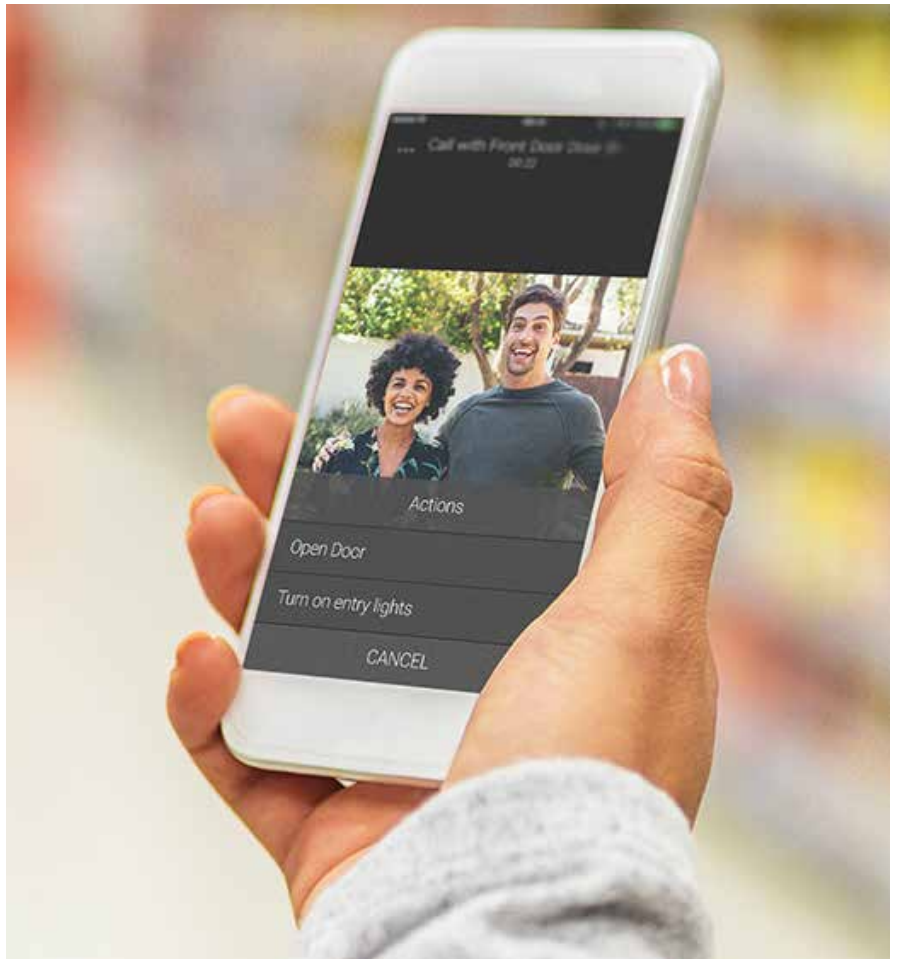

Smart lock integration with your home automation system gives more options to monitor and protect your home through user-specific pass codes, email, and text message alerts.

- Manage locks from anywhere in the world on an iOS or Android device.
- Add or delete users and grant temporary access to any lock in the house.
- Search event history, such as security incidents, and get detailed activity information.
- Receive notifications via mobile alerts and push notifications that are timely and relevant.

If a picture is worth a thousand words, then video must be priceless. Whether you're checking on a vacation home, wanting to keep your family safe, or simply wondering who is at the front door - nothing gives you peace of mind like seeing them at your fingertips. And best of all you can view the same live video from your home, office, iPhone or anywhere in the world.

- View who's at the front door
- Monitor the baby's room
- See live and recorded video from anywhere in the world
- Camera features like pan, tilt, zoom
- Perfect for vacation homes

Keep an eye on what is important to you

Atlanta Audio & Automation can provide discreet video surveillance systems for your home including interior, exterior, and gate applications. These systems may include high definition, pan/tilt/zoom, motion enabled cameras and/or IP network-based cameras and can be viewed from in-wall touch panels, televisions in the home, and remotely via a handheld device or personal computer from anywhere in the world. Digital video recording and camera playback are standard components of any system. A complete line of styles and colors are available to fit seamlessly into any environment. Surveillance can be integrated with any home automation system or can be used as a stand-alone system, but either way gives you that security and peace of mind that your home is protected.

Peace of mind at **home or away**

By integrating with the leading brands in security cameras and NVRs, smart locks and sensors, water and air filtration sensors, and the most advanced security monitoring stations, you can monitor your house 24x7 and be notified immediately if a door opens, the water heater leaks or if you left the garage door open. Sensors aren't just for security; they can automate lighting and comfort products, too.

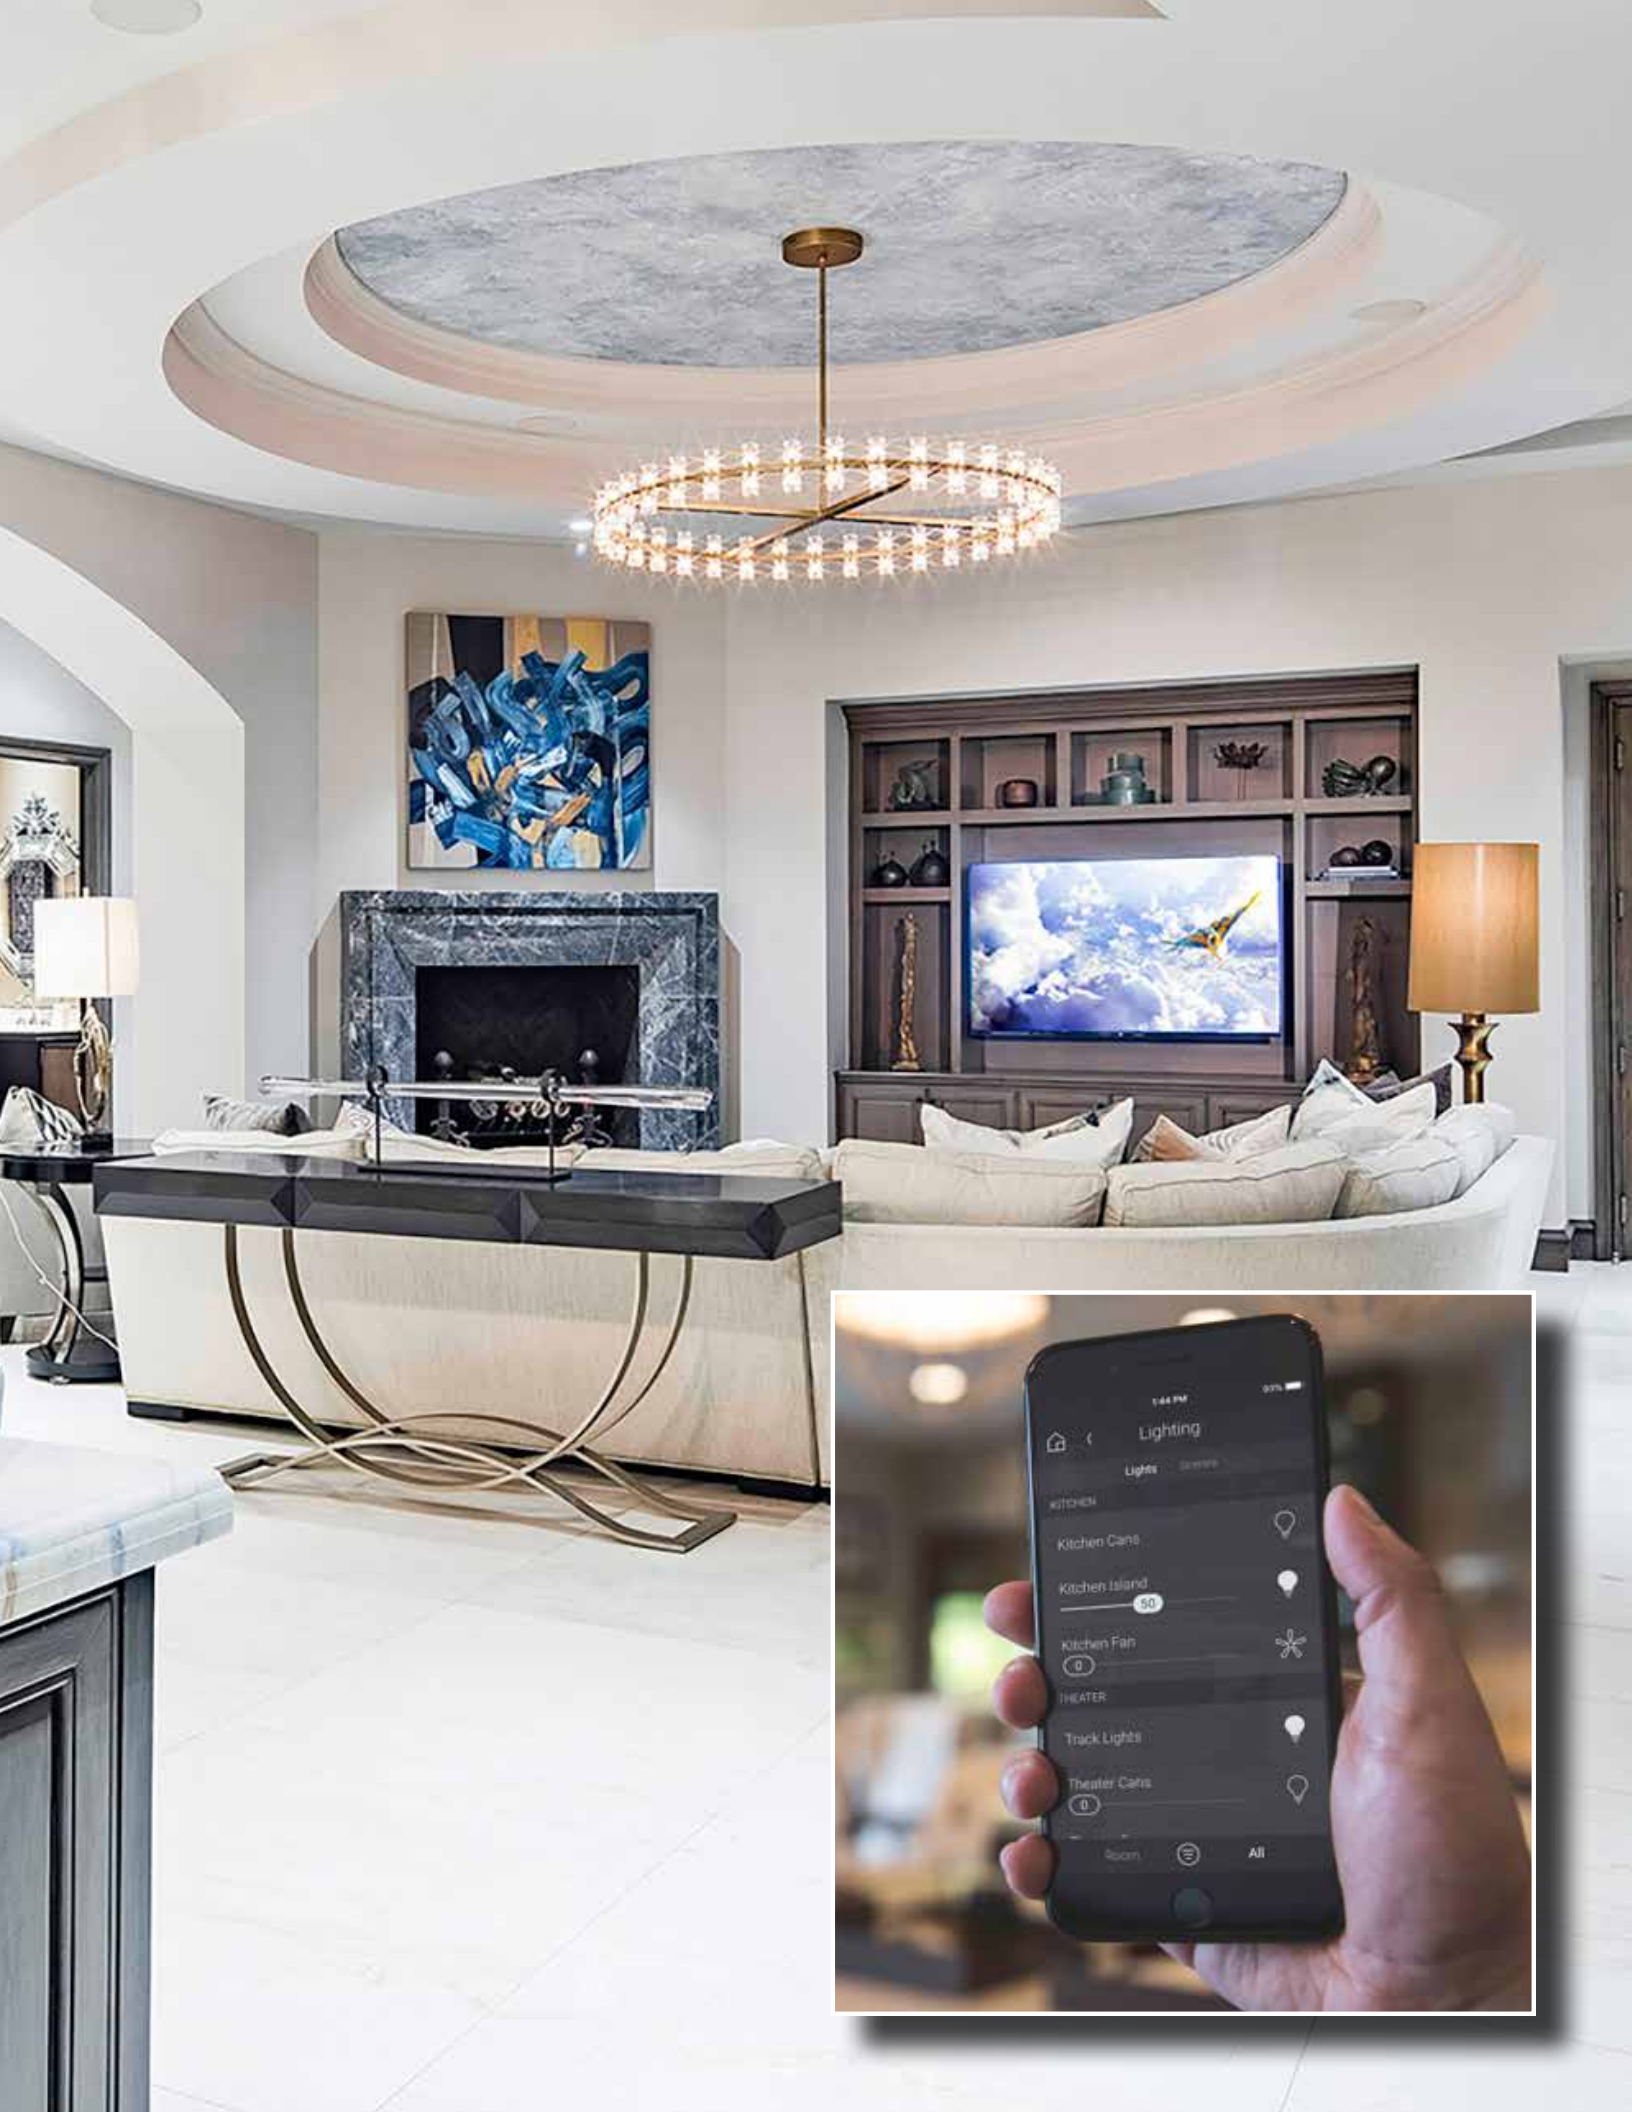

Lighting & Shade Control

Press a button, and lights brighten while shades go down. Press another button, and the lights dim and music plays. Press another, and lights go out in your room, and all over your home. Manage multiple rooms from a single keypad, and preset levels and areas for specific events, like Party, or Away. Program certain lights to turn on or off at specific times. Control everything that can be controlled in your home, automatically, from a touch panel, any mobile device, or even with voice recognition technology. If part of your bedtime ritual involves going from room to room checking the lights, there is a better way.

With smart home technology, lighting and shade control, a simple touch can quickly turn them all off, or set the perfect party mood for the entire home. Save energy by dimming lights, managing shades, creating custom schedules for landscape lighting, and schedules for climate control. Plus, remote access features will ensure you always arrive to a well lit home.

In addition, lighting and shade control is directly linked to your physical and emotional well-being. Circadian rhythm lighting and dawn/dusk simulation improves sleep, energy, and mood. Automating your lighting to incorporate these can enhance your health and well-being.

Bright ideas to fit your lifestyle

Smart lighting control provides extensive customization, flexibility, and style for the high-tech homeowner. Smart lighting is one of the biggest opportunities for you to subtly, but effectively, influence the ambiance of your home and complement the aesthetics of its decor.

The configurable keypads are personalized for your home and can create any mood or ambiance with one touch. Control of your lights isn't limited to a spot on the wall. Adjust lights or ceiling fan from your bedside or turn lights on or off from your car. Take your lights to a new level — control them from anywhere in a room or even outside your home.

- Have the lights in the house turn on automatically to welcome you home
- Use motion sensors to provide hands-free illumination
- Program the lights to shut off automatically when a room is unoccupied
- Use keypads to trigger more than just lights, including music, shade control, and energy settings — with a touch of a button
- Illuminate the hallway lights automatically for safe entry as soon as you enter the garage
- Have your outdoor lighting turn off in the morning and turn on as the sun goes down
- Make your home sophisticated enough to appear to be occupied even when you're away
- Wellness modifications such as dawn/dusk simulation for circadian rhythm lighting to improve sleep, energy, and mood

The convenience of **Shade Control**

Motorized shades not only make a home more livable and comfortable, they also provide UV protection and lower energy costs. Atlanta Audio & Automation offers design, installation and integration of ultraquiet motorized shades or drapery systems which are typically

controlled via the lighting system or home control system. Integration of the shades with the home control system allows the shades to be automatically lowered or raised at specific times or under certain conditions such as entering or leaving the home.

Comfort & Convenience

Being comfortable encompasses more than just adjusting the temperature. Control humidity levels, automate shades and lighting, power on the hot tub on your way home, and program your entire house for maximum energy efficiency. Integrate the radiant flooring in your bathroom, forced air, dual fuel and geothermal systems, and air purification systems for maximum total control and comfort.

Climate control that's smart & energy efficient

- Wireless thermostats maintain consistent temperature and humidity control, regardless of the time of day or season.
- Enjoy personalized comfort settings that can be recalled on a schedule or with just a few taps on your phone or touch screen.
- Pool and spa controls make it easy to turn on the heat, set the temperature or crank the jets instantly, right from your smartphone.
- Fireplace sensors are easily controlled from any device within the home. Press the customized "Romance" button and enjoy.
- Program your window shades to lower during the hottest hours of the day, saving on air conditioning costs.
- Automate your sprinklers and lawn systems to respond to weather conditions.

Communication

Video Intercom & Voice Control

Whether you want to see who is at the front door, check in on your sleeping baby or call everyone to the table for dinner, it's simple and convenient with video intercom. With incredibly fast connection speed and high-definition clarity, all this functionality is automatically enabled in every touch screen in your smart home system.

Simplest way to control the house, **your voice**

Home Theater

Dedicated home theaters are one of Atlanta Audio & Automation's passions. We thoughtfully and elegantly design your system to fit your needs, resulting in optical and acoustical perfection. State-of-the-art electronics featuring top of the line speakers and dynamic surround sound and projection systems, are integrated and beautifully contoured to the space, and engineered down to the last detail. Whether small and intimate or grandiose, Atlanta Audio & Automation combines innovation with comfort in home theater design to celebrate the cinematic experience the director intended.

The home theater technology of today can transform your living room or dedicated space into a sophisticated home theater with amazing sound and true-to-life video quality. With the addition of Dolby Atmos, we can create powerful, moving audio by introducing two important concepts to cinema sound; audio objects and overhead speakers. At its best it provides an experience that transcends the cinema experience, making it something more accessible, more personal and more fun. The total home theater experience

combines audio, video, lighting, shades, AV gear and temperature control with one multifunction remote control. Atlanta Audio & Automation can create the “home theater” of your dreams.

- Watch video from multiple sources, including media players, hard drives and portable devices —or browse through them all simultaneously.
- Hide all your equipment in a closet and control everything with a single, easy-to-use remote or elegant touch screen.
- Enjoy smart lighting throughout the room that dims when you press “play” and ramps back up when you press “pause.”
- Incorporate special lighting features, like pathway lights and starry-night ceilings.
- Control your whole home from the theater, including adjusting the room temperature or seeing who is at the front door, without leaving your seat.

With modern 4K and 8K projectors, truly life-size screens are possible at home. Theater speakers and subwoofers produce incredibly realistic, room-filling audio. Enjoy cinema chairs so comfortable, you'll gladly sit in them for hours. Best of all: the only

cell phone that can ring is yours. Selecting a company to help you create your dream cinema is very important as the theater will be with you for as long as you own your home. Atlanta Audio & Automation takes pride in our work and will make your home

theater building project fun, rewarding, and on budget. We can create custom theater designs for whatever look you desire. From classic movie houses to the ultimate sci-fi theater, if you can imagine it, or even if you can't, we can deliver it.

Better than going out to the movies

Power conditioners offer the highest possible performance, ensuring the clearest audio and video.

Acoustical privacy in your living areas is possible with sound isolation technologies

Speakers and subwoofers provide stunning fidelity, bringing films to vibrant life. The right selection is paramount in bringing your home theater to life.

Different screen materials and sizes meet every need: acoustically transparent to hide speakers, high-gain screens for brightly lit rooms, motorized styles that disappear when the show is over, and more.

The comfort of **Home Cinema**

Projectors are smaller, quieter, brighter, and have better picture quality than ever before. Advances in technology make movie watching at home more incredible than ever before. Bring the immersive excitement of true 4K or 8K cinematic images into every living space.

Receivers and amplifiers are key components to your home theater. Big movies have big audio, so these components are an essential part of the sound experience you will have in your home theater.

Seating is available in any style and size, and in what-ever fabric or leather you want. Create your dream theater in comfort.

Dolby Atmos creates powerful, moving audio by introducing two important concepts to cinema sound; audio objects and overhead speakers. The movie's sounds flow all around you to completely immerse you in the action.

Media Rooms

What should your dream entertainment space look like? Multiple flat panel TVs showing multiple games at once? A drop-down projection screen? Music queued up at the touch of a button, played through hidden speakers while you shoot some pool? Or all the above? Media rooms are all about possibilities. From sports and gaming to movies and music, they do it all. However, you spend those precious free moments to relax, you can build a media room that's a perfect fit. Media rooms are mixed-use spaces offering near theater quality audio and video with a more casual feel. More than a TV room, a media room offers the best of both worlds. Atlanta Audio & Automation offers years of experience to help you create and transform any room in your home to a state-of-the-art media center. One touch of an intuitive touch panel reveals the screen and projector, room lighting fades, shades lower and surround sound is activated. Atlanta Audio & Automation leaves nothing to chance when creating the "ultimate" man cave or media room.

Limitless entertainment with **one remote**

Multi-use Media Rooms

With a single remote, you can control virtually everything in your media cabinet. It's an affordable and fast way to experience the New Normal.

- Enjoy music and video from a variety of sources
- A singular, easy-to-use interface lets you do it all. Watch TV, access your movie collection, stream video, power up a video game, or enjoy your entire music library
- Dim the lights without ever leaving the couch
- All of the content you love is at your fingertips, from DVD movies to satellite TV, in stunning, 4K or 8K high-definition and surround sound
- Easily integrates with popular products and services such as Roku, Apple TV, Amazon, Netflix, Hulu and more

Hidden Technology

Style and performance together— Hidden technology for your home

Imagine a living room, seemingly empty of speakers or a picture that converts into a TV at the touch of a button. Or a bathroom TV that's there when you want it, but not when you don't.

Specialized mirrored TVs and lifts and mounts make technology invisible. Advances in architectural in-wall and in-ceiling speakers mean high quality sound is possible from models that blend with the room or are completely hidden behind the

sheet rock. No longer does technology and design need to compete. Now technology can complement, and even enhance, the distinctive style of a space, room, or home. At Atlanta Audio & Automation we blend technology and style, fusing functionality with beauty to create the perfect digital lifestyle for the modern home.

Style and performance together—**hidden technology in your home**

High Performance Audio

The rising, powerful crescendo of an orchestra. The soulful wailing of a blues guitar. The shimmering, thrilling brilliance of operatic soprano. These are but a few of the musical moments that elicit emotional response. Music isn't merely listened to through a high-performance audio system, it is experienced. Details you never heard are revealed and instruments sound so real, they seem present in the room. While many think they won't be able to hear the difference, once you experience the wonder of hi-fi, you're converted forever. Big or small, digital, analog, or both, quality audio is available to everyone.

Atlanta Audio & Automation presents a wide range of the world's best components for enjoying the wonders of music. Our selection of products dedicated to music reproduction is one of the most highly rated in the Atlanta area. From Bang & Olufsen and Martin Logan to Paradigm/Anthem and Monitor Audio, our range of audio components offers you products that provide great sound, fit well with any home decorative style and are easy to use. Your new stereo system from Atlanta Audio & Automation will bring you many years of listening pleasure.

Audio for the soul

Elevate your listening experience with a High Performance Audio system that will wow even the most discerning audiophiles. Whether you're in the mood for streaming audio or an album from your collection, you will be able to hear the difference with a high-fidelity sound system. Today's audio is a pleasing blend of old and new technologies. Based on the quality level you desire for your listening needs, we'll create the best combination of equipment from amps, preamps, receivers, turntables, speakers, and more.

Enjoy studio sound **in your home**

Turntables are back in a big way. Experience the warmth of vinyl for the first time, or even better than you remember.

Preamp/processors decode audio, whether it's from a computer, a disc player, or even the web. Amplifiers drive the speakers, supplying them with the power they need for clear, lively sound. High-quality cables ensure that you get the best performance without interference from outside noise.

Sub-woofers create deep bass sounds, and can be located anywhere in a room. Multiple subs can sound better, or louder, than single units.

Partners

Welcome to the finest selection of audio and video and home automation solutions from the world's most innovative and dependable technology manufactures. How it Works?

Friendly & Effective Remote Support

Simply call or email, and in as little as 10 minutes a member of our team will get to work on resolving your issue. Our specialists are trained to identify the problem and remotely solve many of the most common technology failures.

Fast & Reliable On-site Support

When an issue can't be solved remotely, our memberships provide prioritized access to on-site support technicians. These technicians are briefed by the remote team and will have the knowledge they need to quickly and efficiently solve the issue.
